151 W. McMILLAN STREET CINCINNATI, OHIO (513) 281-3600

To Whom It May Concern:

HUDEPOHL CONSTRUCTION COMPANY designed and built our Biergarten, a project that began in 1997. They did a tremendous job in planning and organizing the project, as well as giving us several helpful suggestions to make the Biergarten "a great place to meet your friends!" They were also quick and efficient in making changes that we requested, as well as meeting the demands of the City of Cincinnati.

HUDEPOHL CONSTRUCTION completed the Biergarten in time for a spring of 1998 opening, even though we ran into several uncontrollable problems that prolonged parts of the project. They also worked well to help us save money where we could, without jeopardizing the quality we were wanting for the Biergarten.

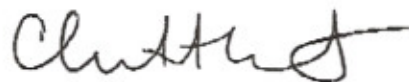

After one year of tremendous success in business, we needed two areas to be addressed. One was a noise problem that the neighbors complained affected their properties. The second was to expand our storage and walk-inbox/freezer capability. HUDEPOHL CONSTRUCTION was ready to take care of our needs. They designed and built additions to the Biergarten to address the noise, and they coordinated the storage project with the re-designing of our restaurant, to help save time and money. Once again, they did a tremendous job in planning and executing the jobs, meeting our needs, as well as those demands the city required. The re-design of the restaurant was completed in February 2000.

HUDEPOHL CONSTRUCTION deserves a high recommendation, and we look forward to doing future business with them.

Sincerely,

Wm. H. Windholtz
